M.H. Saboo Siddik College of Engineering – Byculla, Mumbai	2020 – 2024
Bachelor of Engineering, Computer Science and Engineering (AIML) CGPA: 9.37	
S. I. E. S College of Arts, Science and Commerce – Sion, Mumbai	2018 – 2020
Higher Secondary School Aggregate: 82.46	

WORK EXPERIENCE

TTA Dev Mouthshut.com Mumbai	11/24 – Current
- As a Technical Trainee Analyst Developer, I contributed to 21 software builds in 9 months, obtaining operational experience with the entire technological stack with tools including ASP.NET, VB.NET, C#, MySQL, and AngularJS. - Showed a reliable capacity to achieve results across a variety of tasks (PRT, CRT, NRT), successfully handling bug resolutions, feature upgrades, and the implementation of new functionalities within challenging timeframes. - Utilized strong analytical skills and proactive testing strategies to enhance build processes, leading to an estimated 40% increase in overall build efficiency by reducing iterative cycles and ensuring prompt task execution, even under pressure.	
S3WaaS Intern NIC Mumbai	06/23 – 08/23
- Successfully migrated content from 3 government websites to the S3WaaS Framework, ensuring adherence to Government of India Web Guidelines (GIGW) throughout the process. - Performed weekly comprehensive audits for 5 government websites, identifying and resolving 20 WCAG compliance issues, resulting in a 25% improvement in overall accessibility. - Collaborated with a team of developers to ensure smooth migration and troubleshoot any technical challenges.	

PROJECTS

VASt NextJS, TailwindCSS, Python	2025
- An ongoing project to build a platform for APK testing and generating detailed reports based on the vulnerabilities that are present in the application. - The user interface is designed using NextJS and TailwindCSS which provide both light and dark theme layout for better user experience. The test are integrated using python libraries which help analyze the security issues effectively.	
FirstLightEvents NextJS, TailwindCSS, Framer Motion	2024
- Designed a portfolio website for an event management company to provide them a platform to showcase their work and land potential clients by increasing their reach with the help of the website. - Delivered a fluent User Interface using NextJS and TailwindCSS and kept things interactive with adding animations using Framer Motion. Added a contact medium via form using Next Auth and Nodemailer.	
Guessify React, Firebase, Socket.io, SCSS	2024
- Engineered a user-centric gaming website, allowing users to create personalized gaming rooms and engage in friendly guessing competitions, featuring a message box for real-time discussion and an updated scorecard at the end of each round. - Implemented a minimalist design and intuitive functionality to optimize the user experience, fostering a seamless and enjoyable gaming environment.	
QuizR ReactJS, MongoDB, NodeJS, Tailwind CSS	2023
- Developed an interactive and collaborative quiz platform featuring categorical quizzes and user profile functionalities, allowing users to track their current best scores. - Implemented a seamless and engaging experience to enhance user participation and satisfaction.
